FULL-STACK DEVELOPER

Hithesh SVSK

Building trading systems

Builds real-time trading observation systems, business web apps and multilingual Vue apps, from Python backends to polished Vue frontends.

IN [LinkedIn] @ [email] TEL [phone] LOC [city], India

01 / About

Python on the backend, React & Vue on the front, markets in between.

I build full-stack software end to end: Python services that watch markets in real time, and React and Vue frontends for businesses and everyday users. My trading tools are observation-first, so every signal is reviewed by a person before any trade is placed. Alongside them I co-founded PawSattva and built AquaKart, two production web apps serving real customers.

01

Trading systems

Signal engines for gold and silver on MT5 and MCX, with Discord interfaces and outcome tracking.

python · mt5 · dhanhq

02

Business web apps

Customer-facing platforms like PawSattva's feed planner and the AquaKart catalogue.

react · vue · web

03

Multilingual apps

Hindi, English and Telugu content with text-to-speech in Mantra Darshan.

vue 3 · ts · i18n

02 / Tech Stack

Tools I ship with

FE Frontend — 07

React · Vue 3 · TypeScript · JavaScript · Vite · HTML5 · CSS3

BE Backend — 06

Python · Node.js · Express · Socket.IO (real-time chat) · REST APIs · Micro-frontend architecture

DB Databases — 05

PostgreSQL · SQLite (WAL) · Firebase Firestore · Supabase · Parquet archives

TR Trading & APIs — 03

MetaTrader 5 Python API · DhanHQ API v2 (MCX) · Discord bots / slash commands

TL Tools — 03

Git · GitHub · Windows server setup

AI AI-Assisted Dev — 04

GitHub Copilot · Cursor · Claude · ChatGPT

03 / Featured Projects

Selected work

FEATURED Trading system · Solo build

Aureon Beast: Gold & Silver Trading Observation System

Watches gold and silver in real time, posts signals to Discord, and waits for a human to confirm before any trade is placed.

2	M5	4	0
metals · XAU / XAG	signal timeframe	slash commands	auto-trades

- Real-time signal engine for XAUUSD and XAGUSD on M5 with EMA cross, wick and volume-profile analysis
- Discord command interface (/execute-trade, /status, /monitor, /remind price) with human-confirmed trade execution; detections never auto-trade
- Trade lifecycle tracking and automated weekend performance reviews
- Migrated state from Firestore to local PostgreSQL with Parquet candle archive and optional Supabase mirror

Python MT5 Firestore → PostgreSQL SQLite outbox Parquet Discord Vue

GitHub ↗

HOW IT WORKS SIGNAL → HUMAN → TRADE

01	Market feed	MT5 Python API
02	Signal engine	EMA · wick · VP
03	Outbox queue	SQLite
04	Signal card	Discord
05	Human confirm → order	/execute-trade

storage → PostgreSQL · Parquet candles · Supabase mirror

Trading system · Solo build

Aureon MCX: Commodity Futures Signal Bot

4 timeframes **2** MCX contracts

- MCX GOLD and SILVER futures observation with multi-timeframe context (M5, M15, H1, H4)
- Dynamic SymbolResolver instead of hard-coded contract IDs
- Read-only Discord signal cards with final-check step; MFE/MAE outcome learning

PIPELINE

DhanHQ v2 → SymbolResolver → MTF context → Final check → Discord card → MFE/MAE

Python DhanHQ API v2 SQLite (WAL) Discord

Web app · Co-founder & Developer

PawSattva: Pet Nutrition Web App

4 step consultation **3** diet goals

- Co-founder and developer of a pet nutrition platform
- Built the Pet Feed Planner: multi-step consultation form (Pet Parent → Pet Profile → Body Condition → Feeding Details)
- Supports personalised diet plans for maintenance, weight loss and weight gain

FEED PLANNER FLOW

Pet Parent → Pet Profile → Body Condition → Feeding Details → Diet plan

[confirm stack] pawsattva.com ↗

E-commerce · Developer

AquaKart

- E-commerce site for water softeners, purifiers and filtration products
- [add features: product catalogue, enquiry form, payments, etc.]

[confirm stack] aquakart.co.in ↗

Vue app · Solo build

Mantra Darshan: Multilingual Deity Mantra App

3 languages · HI / EN / TE

- Select a deity to view its mantra in Hindi, English and Telugu
- Text-to-speech playback and animated 3D deity visuals

USER FLOW

Pick deity → Choose language → Read mantra → Play TTS

Vue 3 TypeScript Vite

Web Speech API [confirm]
